PROFESSIONAL SUMMARY

I am a Junior Full Stack Software Developer with a Bachelor of Science in Software Engineering and hands-on experience of 2 years building scalable, user-focused software solutions. Skilled in frontend and backend development, quality assurance, software testing, and system support. Passionate about creating efficient digital systems that solve real-world problems and improve user experiences.

TECHNICAL SKILLS

- **Programming Languages & Technologies**
Python, JavaScript, Java, HTML, CSS, React, Django, PostgreSQL
- **Other Skills**
Git & GitHub, REST APIs, JWT Authentication, Software Testing, Quality Assurance, System Troubleshooting, IT Support, Networking, Microsoft Office Suite, Problem Solving, Team Collaboration

EXPERIENCE

JAN 2025 – PRESENT

Full Stack Junior Developer for Accountancy Practitioners Forum

- Developed and maintained core frontend features for the APF system using React, ensuring responsive, user-friendly, and accessible interfaces for both public and internal users
- Integrated frontend components with backend services built in Python and PostgreSQL, supporting smooth data flow, secure user authentication, and reliable system performance
- Led Quality Assurance activities including test planning, bug tracking, system validation, user acceptance testing, and continuous improvements to system usability and reliability

2. ShopConnect

Full Stack Developer

- Developed a location-based platform connecting shoppers and business owners through authentication, QR code shop identification, and location-based discovery
- Built vendor dashboards, item listings, and order management functionality

Other Experience

2023 – 2024- Network and Systems Support Intern

Uganda Civil Aviation Authority (UCAA)

- Supported system setup, software installation, and domain configuration
- Assisted with troubleshooting, network maintenance, user account management, and enterprise IT support operations

EDUCATION
